WCFV guides your partner into finding a fulfilling job

Congratulations on your new job! Soon you will relocate to the Netherlands with your family. The workplace enables you to easily build a social network which benefits a soft landing in your new environment. To help your partner to also find their way in the Netherlands, WCFV developed the Dual Career Program. We guide them in their search of a fulfilling job of their own. A career helps your significant other to be part of the Dutch society and make them feel at home in our small country. Furthermore, it means you can focus on your new job with more peace of mind.

*If you are interested in this program, please consult your department's management about the possibilities.*
